

STATE OF MINNESOTA
OFFICE OF ADMINISTRATIVE HEARINGS
FOR THE PUBLIC UTILITIES COMMISSION

In the Matter of the App. of Enbridge
Energy, Ltd. Partnership for a Route
Permit and Partial Exemp. for the Fond
du Lac Line 4 Project 18-752

REPORT TO THE COMMISSION

On February 25, 2019, Enbridge Energy, Ltd. Partnership (Applicant or Enbridge) filed an application for a route permit and partial exemption from certain pipeline routing permit procedures with the Public Utilities Commission (Commission or PUC). The Line 4 Project as proposed would relocate approximately ten miles of the existing Line 4 pipeline from the center of the existing Enbridge Mainline Corridor (Corridor) to the outer edge of the Corridor within the Fond du Lac Band Reservation. The Line 4 Project also proposes to deactivate and remove the existing above-grade Line 4 segment.

On April 11, 2019, the Commission ordered that two public information meetings be held regarding Enbridge's application for a route permit and partial exemption for the Line 4 Project. Administrative Law Judge Kimberly Middendorf conducted the first public meeting at 1:00 p.m. on May 22, 2019, at the Arrowhead Town Hall, 9798 US-2, Brookston, MN 55711, and the second public meeting at 6:00 p.m. on May 23, 2019, at Fond du Lac Tribal and Community College, 2101 14th Street, Cloquet MN 55720.

I. Notice

The Applicant published notice of the application acceptance in the *Duluth News Tribune* and *Pine Knot News* on April 26, 2019.¹ Copies of the Line 4 Project application and notice of the public information meetings and the comment period were mailed to local libraries, certain state agencies, local government entities, and affected landowners by April 24, 2019.² Notice of the meetings and comment period was also posted to the PUC's website on April 26, 2019.³ Following a 50-day public comment period, the hearing record closed on June 14, 2019, at 4:30 p.m.⁴

¹ PUC Docket No. 18-752, Doc. ID 20196-153578-01, June 14, 2019.

² *Id.*

³ PUC Docket No. 18-752, Doc. ID 20194-152359-02, April 26, 2019.

⁴ PUC Docket No. 18-752, Doc. ID 20194-152359-01, April 26, 2019.

II. Meeting Attendance and Comments

Both meetings were lightly attended, with three or four members of the public present at each meeting. Mike Kaluzniak, Energy Facilities Permitting Planner for the PUC, gave a short presentation about the pipeline permitting and exemption process. Louise Miltich, Environmental Review Manager in the Energy Environmental Review and Analysis unit (EERA) of the Department of Commerce, presented an overview of EERA's review process. Paul Eberth of Enbridge Energy Ltd. Partnership presented a summary and overview of the Line 4 Project.

No oral testimony was offered at the May 22, 2019 meeting. At the May 23, 2019 meeting, one member of the public spoke. The comments were critical of oil dependence and pipeline construction in general. Further, the speaker objected to the Line 4 Project because she believes that doing business with Enbridge does not benefit members of the Fond du Lac Band. The speaker expressed that not all members of the Band agree with the Band's expression of support for the Line 4 Project.

III. Written Comments

The Minnesota Pollution Control Agency reviewed the application and, on May 20, indicated it had no comments.⁵

The Minnesota Department of Natural Resources (DNR) provided comments on June 13, 2019.⁶ First, DNR noted that the Line 4 Project application uses the information gathered for the Line 3 Project to assess potential impacts of the Line 4 Project. DNR maintains that because the Line 4 Project is a separate project, a separate Natural Heritage Review needs to be completed for the Line 4 Project. DNR requests that the Applicant submit a Natural Heritage Information System Data Request to DNR's Endangered Species Review Coordinator.

Second, DNR noted that the Line 4 Project crosses a public watercourse, Stoney Brook. This watercourse is a trout stream, which is a sensitive crossing. The Applicant must prepare a site-specific plan for the crossing. In addition, a DNR license to cross public waters at this location is required, independent from the Line 3 Project.

Third, DNR administers a portion of Fond du Lac State Forest. DNR advises that a license to cross public lands will be required for the Line 4 Project, which may include conditions related to abandonment procedures.

Fourth, DNR commented on the best management practices proposed by the Applicant. DNR recommends that the route permit include a condition requiring the Line 4 Project to follow the finalized version of the Environmental Protection Plan and other applicable plans required for the Line 3 Project.

⁵ PUC Docket No. 18-752, Doc. ID 20195-153021-01, May 20, 2019.

⁶ PUC Docket No. 18-752, Doc. ID 20196-153555-01, June 13, 2019.

Finally, DNR notes that the Line 4 Project application does not specifically address hazardous materials handling. DNR recommends that the Applicant identify and use measures to avoid contamination and to ensure proper transport and disposal of hazardous materials.

The Minnesota Department of Transportation (MnDOT) reviewed the Line 4 Project application and offered comments on June 13, 2019.⁷ MnDOT determined that the project area does not directly affect the state trunk highway system but noted that the Line 4 Project may require coordination with MnDOT to ensure that highway construction plans do not impact the movement of oversized loads that may be required. In addition, any work that is required within MnDOT right of way should be coordinated with MnDOT.

The Applicant submitted written comments on June 14, 2019.⁸ The Applicant indicated it considers the EERA's Sample Route Permit to be reasonable and offered minor changes to provide additional description of project facilities or to correct typos. The Applicant indicates it will work with the state agencies to address their concerns and recommendations. The Applicant requests that the PUC grant the partial exemption and issue a route permit for the Line 4 Project.
